Separate paging is given to this Part in order that it may be filed as a separate compilation

PART III—SECTION 2

Notifications and Notices issued by the Patent Office relating to
Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 19th September 1959

Application for Patents

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

3rd September 1959

68945. SPOFA, sdruzeni podniku Pro zdra-votnickou vyrobu. Process for the manufacture of basic 1: 3-disubstituted phenothiazine derivatives.

68946. H. Kosaka. Tester for jockey pulleys used in textile machinery.

4th September 1959

68947. Montecatini Societa Generale Per L'Industria Mineraria E Chimica. Continuous process for the direct hydration of gaseous olefins to alcohols with the aid of suitable catalysts.

68948. Deering Milliken Research Corporation. Methods and apparatus for processing thermoplastic yarns. (10th April 1959).

68949. Oatley Technical Developments Limited. Improvements relating to grilling appliances.

68950. The Mining Engineering Company Limited. Improvements in belt conveyors. (27th September 1958).

68951. Clayton Dewandre Company Limited. Improvements in or relating to power assisted steering gear for vehicles. (9th September 1958).

68952. Atomic Energy of Canada Limited. Production of thorium-Uranium alloys. (14th November 1958).

68953. British Insulated Callender's Cables Limited. Improvements in or relating to electric cables. (15th September 1958).

68954. The Rawlplug Company Limited. Improvements in or relating to wall plugs. (9th September 1958).

5th September 1959

68955. G. D. Thakoor. An improved device for delivering measured quantities of granular solids.

68956. The Nuclear Power Plant Company Limited. Improvements in and relating to safety release mechanisms. (8th September 1958).

68957. R. L. Kumria. Device for a game of intellect.

68958. Union Carbide Corporation. Arc torch chemical reactions. (13th April 1959).

68959. The General Electric Company Limited. Improvements in or relating to auxiliary equipment for nuclear reactors. (9th September 1958).

7th September 1959

68960. Mrs. Nargis Sami Engineer. An improved lockable stopper for bottle and the like containers.

68961. Siemens Edison Swan Limited. Improvements relating to lighting fittings. (8th September 1958).

68962. Siemens Edison Swan Limited. Improvements relating to lighting fittings. (8th September 1958).

68963. Siemens Edison Swan Limited. Improvements relating to lighting fittings. (8th September 1958).

68964. Siemens Edison Swan Limited. Improvements relating to lighting fittings. (8th September 1958).

68965. The Dow Chemical Company. Graft copolymer compositions and process for their preparation.

68966. The Dow Chemical Company. Elastomeric copolymers of ethylene and process.

68967. Les Usines De Meille. Process for extracting citric acid from aqueous solutions thereof.

68968. Wilson Jones Company. Loose leaf binder. (17th October 1958).

68969. S. M. Kapur. Locking device for the telephone.

68970. N. V. Philips' Gloeilampenfabrieken. Improvements in methods of purifying solid bodies. (18th September 1958).

68971. Daimler-Benz Aktiengesellschaft. Improvements relating to motor vehicles. (10th June 1959).

68972. Recondo Private Limited. Improvements in or relating to containers for the distribution of bulk bitumen.

68973. Ciba Limited. Process for the manufacture of pyridine carboxylic acid amides.

8th September 1959

68974. R. D. Kolandaiswamy. Railway rail chair.

68975. C. G. Beard. A fertilizing soil-conditioner.

68976. H. H. Mansoori, Y. H. Mansoori, N. H. Mansoori, I. H. Mansoori and I. H. Mansoori. Modification and improvement in manufacturing of pickers used in jute weaving industry.

68977. H. H. Mansoori, Y. H. Mansoori, N. H. Mansoori, I. H. Mansoori, and I. H. Mansoori. Modification and improvement in manufacturing of pickers used in textile industry.

68978. Imperial Chemical Industries Limited. New azo dyestuffs. (29th September 1958).

68979. Marconi's Wireless Telegraph Company Limited. Improvements in or relating to automatic radio distress alarms for aircraft. (18th September 1958).

68980. S. Smith & Sons (England) Limited. Improvements in or relating to resetting mechanisms for meters. (9th September 1958).

68981. Westinghouse Brake & Signal Company Limited. Automatic slack adjusting mechanism. (16th September 1958). [Addition to No. 63462].

68982. Westinghouse Brake & Signal Company Limited. Improvements in or relating to apparatus suitable for automatically controlling a retarder in a hump yard. (17th September 1958).
68983. The Goodyear Tire & Rubber Company. Improvements in polymerizations of diolefins.
68984. New Consolidated Gold Fields Limited. Improvements in ion exchange processes. (11th September 1958).
68985. Ciba Limited. Manufacture of new heterocyclic compounds containing sulphur.
68986. Cooler Manufacturing Company Limited. Improvements in or relating to fluid temperature control means. (8th September 1958).
68987. Egyesult Gyogyszer Es Tapszergyar. Process for the production of threo-1-p-nitrophenyl-2-acvlamino-propane-1, 3-diols.
68988. Spofa, Sdruzeni podniku pro zdravotnickou vyrobu Procedure for the preparation of new physiologically active products of sulfonation of heterosides saponin and tannin and their salts.

9th September 1959

68989. General Electric Company. Improvements in or relating to "Diamond Synthesis".
68990. General Electric Company. Improvements in or relating to "Method of making diamonds".
68991. General Electric Company. Improvements in or relating to "Diamond Synthesis".
68992. General Electric Company. Improvements in or relating to "Diamond Synthesis".
68993. General Electric Company. Improvements in or relating to "Abrasive material and preparation thereof".
68994. American Radiator & Standard Sanitary Corporation. Cooling coil for hermetic motors using system refrigerant.
68995. American Radiator & Standard Sanitary Corporation. Hermetic motor cooling by direct expansion of system refrigerant into motor.
68996. Dr. A. Katchalsky, Professor, Dr. I. Bursztyn, Dr. M. Rim, and Dr. D. Vofsi. Process and preparations for conditioning soil.
68997. W. & T. Avery Limited, (formerly known as Averys Limited). Improvements in or connected with load indicating mechanism. (16th September 1958).
68998. Imperial Chemical Industries Limited. New organic compounds. (3rd October 1958).
68999. Commissariat A L'Energie Atomique. Slide-rule for performing calculation involving screens to protect personnel against radiations.
69000. Merck & Co., Inc. Improved process for the introduction of a hydrocarbon radical at the beta position of an α , β -unsaturated ketone. (19th December 1958).
69001. Merck & Co., Inc. Hydrogenation of 5-hydroxymethyl furfural. (4th May 1959).
69002. Wm. Gardner & Sons (Gloucester) Limited. Improvements in or relating to rotary drum mixers. (10th September 1958).
69003. South African Farm Implement Manufacturers Limited. Improvements in or relating to agricultural implements. (11th September 1958).
69004. Ciba Limited. Chromium coordination complex compounds and process for their manufacture.

Alteration of Date

63304. The claim to priority date 11th March 1957 has been abandoned and the application dated as of 4th March 1958, the date of filing in India.
65349. The claim to priority date 24th September 1957 has been abandoned and the application dated as of 23rd September 1958, the date of filing in India.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of this Gazette of India give notice to the Patents Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933, of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta, in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specification together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

62723. Industrial Minerals and Chemicals Co. Improved quick-setting cement composition and method of manufacturing the same. Accepted on 1st September 1959.

Composition of portland cement, calcium chloride, calcium sulphate and calcium oxide.

62791. A. V. L. C. DEBRIE. Film track guide for cinematographic cameras, projectors and similar apparatus. Accepted on 2nd September 1959.

On the one hand one of the guide-grooves is urged towards the other by elastic pressure, and on the other hand the U-shaped grooves running straight before and after plate aperture in moving direction of film comprise connecting portions having oppositely directed bends.

63284. Metallurgical Processes Limited, and The National Smelting Company Limited. Improvements in or relating to the blast-furnace smelting of zinc. (1st March 1957). Accepted on 1st September 1959.

In a process of smelting an oxidic zinciferous material with coke in a blast furnace, the charge in the furnace includes iron oxides, lime and silica in such proportion that molten slag produced during smelting is of a specified composition.

63285. The English Electric Company Limited. Improvements in and relating to electrical current carrying assembly. (13th March 1957). Accepted on 1st September 1959.

In which a current carrying member is mounted on an insulating support and electrical connection is made between the member and a further conductor by a bolted connection.

63304. The General Electric Company Limited. Improvements in or relating to phosphors. Accepted on 4th September 1959.

Consisting alkaline earthmetal halophosphate activated by copper in cuprous state.

63345. T. J. R. Bright. Improvements in or relating to the production of patterns and moulds for use in the production of castings, pressings and the like. Accepted on 8th September 1959.

Pattern being made of wax or other suitable material which melts at a low temperature and having an integral parting plate made of the same material.

63346. Ethyl Corporation. Gasoline composition. Accepted on 8th September 1959.

Containing at least about 1 gram of lead as an organolead antinock agent per gallon of gasoline and one or a mixture of non-ionic manganese poly-carboxyl compounds.

63350. Hobourn-Eaton Manufacturing Company Limited. Rotary pump. (29th November 1957). Accepted on 8th September 1959.

Plurality of pumping elements are drivingly disposed in a slotted rotor and are movable radially on an encompassing cam track constituting the peripheral wall of the chamber.

63355. Mansanto Chemicals Limited. Process for the preparation of organic polysilicates and the use thereof. (15th March 1957). Accepted on 8th September 1959.

Treating organic silicate with phenol containing at least two hydroxyl groups.

63361. The Wellcome Foundation Limited. Improvements in and relating to quinoline derivatives and the manufacture thereof. (22nd March 1957). Accepted on 8th September 1959.
- An 8-substituted alkylaminoquinoline is reacted with a piperazine, or a substituted alkyl piperazine is reacted with an 8-aminoquinoline and if desired the product is hydrolysed.*
63412. Cromelite (India) Private Ltd. Folding chairs. Accepted on 8th September 1959.
- The back frame is connected to the rear legs by pivotally mounted links above the lower ends of rear legs and is also pivotally connected to the arms rests and the seat frame respectively.*
63614. Siemens Edison Swan Limited formerly Siemens Brothers & Co. Limited. Improvements relating to magneto-strictive delay lines in combination with pulse lengthening circuits. (8th April 1957). Accepted on 1st September 1959.
- Incorporating a pulse lengthening circuit and a coincidence gate.*
63651. P. B. Menon. Power regulator for A.C. electric fan motors. Accepted on 5th September 1959.
- Comprising plurality of condensers which are arranged to be connected step by step in parallel amongst each other and in series with the fan motor.*
63663. May & Baker Limited. Improvements in or relating to amines and to processes for their preparation. Accepted on 1st September 1959.
- p-Amino-phenoxy-alkyl and-alkenyl compounds are prepared by introducing by conventional methods an oxyalkyl or-alkenyl group into a substituted phenyl derivative.*
63980. Ciba Limited. A new sulphonamide derivative and a process for its manufacture. Accepted on 9th September 1959.
- 3-(para-amino-benzene-sulfonamido)-2-phenyl-pyrazole is reacted with formaldehyde in the presence of a dilute acid.*
64045. F. A. Hughes & Co. Limited. Means for protection of ship's hull against corrosion. (22nd May 1957). Accepted on 4th September 1959.
- Means for the distribution of water-insoluble liquid marine growth deterrent over the under-water surface of the hull.*
64073. D. Napier & Son Limited. Assemblies including helical splines and coil springs. (20th May 1957). Accepted on 4th September 1959.
- Radius of the helical spline coupling relatively movable parts, mean radius of coil spring being such that $R = r \sqrt{1 + \sigma}$ where R is mean radius of helical spline coupling, r is mean radius of spring coils and σ is Poisson's ratio for spring.*
64167. The British Petroleum Company Limited. Improvements relating to synthetic lubricants. (24th May 1957). Accepted on 7th September 1959.
- Comprising a blend of one or more liquid aliphatic diester of a saturated aliphatic dicarboxylic acid and a polyester soluble in the diester.*
64338. Asahi Kasei Kogyo Kabushiki Kaisha. A continuous method for the manufacture of a basic cupric salt and an apparatus thereof. Accepted on 8th September 1959.
- Producing basic cupric salt by mixing in aqueous solution at a temperature of 10° to 30°C and a pH of 6.5 to 7.5, cupric sulphate with a member selected from the group consisting of ammonia and cupric tetramine sulphate.*
64380. Molins Machine Company Limited. Improvements in or relating to the manufacture of composite mouthpiece. (20th June 1957). Accepted on 4th September 1959.
- Axially aligning parts of a group of cigarette length and stub while the parts are free to move relatively to each other, and applying endwise pressure to the group to bring the end surfaces of the parts into close abutting contact.*
64770. Carona Sahu Co. Improved method of fixing upper band or bands to the sole portion of footwear. Accepted on 9th September 1959.
- Forming slits in leather insole for receiving ends of upper bands which ends are thereafter sandwiched between the insole and outer soles, complementary faces of insole and outer sole and sandwiched ends of bands applied with adhesive, kept under compression press and after removing from there, allowed to cure.*
64867. United States Borax & Chemical Corporation. Process for separating components of a particulate mixture by means of flotation reagents. Accepted on 5th September 1959.
- Including the step of releasing the alkylamine from the separated coated component by adding thereto an aqueous alkaline solution and separating the uncoated particles from the released alkylamine.*
64886. Wall Macnaught Pty. Limited. Improvements in pumps for pumping viscous substances. (8th August 1957). Accepted on 5th September 1959.
- Hand actuated means to move the plunger downwardly in a charging operation and a spring to move the plunger upwardly in a discharging operation.*
64977. Farbenfabriken Bayer Aktiengesellschaft. Water-insoluble azo dyestuffs. (3rd June 1958). Accepted on 6th August 1959.
- A tetrazotised diamine is coupled with an azo component free of sulphonic acid and carboxylic acid groups.*
65132. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to variable electric impedances, more particularly variable resistances. Accepted on 5th September 1959.
- Including structural combination of a radiation sensitive body on which at least two electrodes are arranged and a variable source of radiation for regulating the impedance.*
65139. Textool Company Limited. Device to control combustion pressure in internal combustion engines. Accepted on 9th September 1959.
- Consisting of an auxiliary piston in a cylinder head, which is pre-set in its housing to the ignition pressure of the cylinder by some resilient means.*
65247. Creed & Company Limited. Improvements in printing telegraph apparatus. (16th September 1957). Accepted on 5th September 1959.
- Consisting of a plurality of combination members which are positioned according to a code combination either under the control of a key or according to a code combination read from a perforated tape, and means for reading the positions of the combination member to transmit and signal combination in accordance with the said positions.*
65301. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to methods of providing articles with metal oxide layers and articles thus coated. Accepted on 5th September 1959.
- In which the articles are treated, while heating in the presence of water, with the vapour of volatile hydrolysable metal compounds.*
65345. Metropolitan-Vickers Electrical Company Limited. Improvements relating to alternating current electric traction equipment. (24th September 1957). Accepted on 31st August 1959.
- Comprising relay means for preventing condensing of the traction motors for starting, except when rectifiers are in operative condition.*
65349. Hunter-Penrose Limited. Improvements in or relating to photographic colour reproduction apparatus. Accepted on 7th September 1959.
- Including a scanning cathode ray tube operable to direct a spot of white light on to a coloured original.*

65451. E. K. Cole Limited. Improvements in or relating to the amounting of inductance coil assemblies. Accepted on 5th September 1959.

Coil former is secured to the amounting plate by means of a plug inserted into the former through a portion projecting from the plate so as to expand the material of the former.

65524. G. Dirks. Improvements relating to data transfer apparatus. (6th November 1957). Accepted on 4th September 1959.

Including means for sensing characters, a cyclic access storage device, data transfer means and timing means.

65648. W. B. Poludniak. Improvements in liquid fuel burning devices for heating and lighting purposes. Accepted on 9th September 1959.

Comprising a closed fuel reservoir, a burner communicating therewith, and an annular chamber positioned to be heated by the burner and communicating with tubular connections extending into the reservoir the one connection enclosing a wick and extending to near the bottom of the reservoir.

65872. Imperial Chemical Industries of Australia and New Zealand Limited. Adhesive for polythene, and method of using same. (29th November 1957). Accepted on 31st August 1959.

Comprising a polyisobutylene, a tertiary amine, a polyethylene glycol, a condensation product formed by condensation of an organic isocyanate with a hydroxy containing polyester and an organic isocyanate in a amount stoichiometrically equivalent to the amount of polyethylene glycol.

66259. W. Zinkiewicz. Improvements in or relating to device for ground burrowing. Accepted on 31st August 1959.

Motion of the piston beater is effected solely by compressed air fed into cylinder from compressed-air source through control device, also placed in cylinder, controlling automatically the influx of compressed air alternately into internal space of cylinder.

66271. Libbey-Owens-Ford Glass Company. Apparatus for bending glass sheets. Accepted on 4th September 1959.

Adjustable means are provided for adjustably connecting movable mold section to mold section support to selectively alter the closing speed of the mold.

66310. The Oriental Electric & Engineering Co. Improvements in or relating to looms. Accepted on 8th September 1959.

The crankshaft is supplied with driving power at its both ends and the crankshaft drives the tappet through pinions and two yarn beams axially disposed have independent mounted shafts.

Opposition Proceedings

An opposition has been entered by Rodi & Wienerberger Aktiengesellschaft to the grant of a patent on application No. 64639 made by Swisssco Sales Corporation.

Opposition Proceedings

An opposition has been entered by Bata Shoe Company Private Limited to the grant of a patent on application No. 62086 made by Carona Sahu Co., Private Limited.

Amendment Proceedings

(1)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911, that Elektrophysikalische Anstalt Bernhard Berghaus, of Vaduz, Liechtenstein, a

Corporate Body organised and existing under the Laws of Liechtenstein, seek leave to amend the description in the specification in respect of Patent Application No. 62393. Any person desirous of opposing the application for amendment should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (Form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta 17. The proposed amendment may be seen free of charge at the Patent Office, or copies thereof may be obtained from the Patent Office, on payment of the usual charges.

(2)

The amendment proposed by N. V. Philips' Gloeilampenfabrieken in respect of Patent Application No. 64478 as advertised in the Gazette of India, Part III, Section 2, dated the 16th May 1959 has been allowed.

(3)

The amendment proposed by Asta-Werke Aktiengesellschaft in respect of Patent application No. 64480 as advertised in the Gazette of India, Part III, Section 2 dated the 30th May 1959 has been allowed.

(4)

The amendment proposed by Ayerst, McKenna & Harrison, Limited in respect of Patent application No. 61946 as advertised in the Gazette of India, Part III, Section 2 dated the 30th May 1959 has been allowed.

Restoration Proceedings

(1)

Notice is hereby given that an order was made on the 31st August 1959, restoring the patent numbered 52342, dated as of the 15th July 1954 granted to Champalal Gupta for, "Preparation of colloidal suspension suitable for use as blood plasma substitutes."

(2)

Notice is hereby given that an order was made on the 31st August 1959 restoring the patent numbered 52891, dated as of the 13th October 1954 granted to Champalal Gupta, for "Method of producing resinous antacid compositions for human therapy."

(3)

Notice is hereby given that an application has been made under Section 16 of the Indian Patents and Designs Act, 1911 for the restoration of the following patent —

No 55355—*Societe Civile D Etudes Pour Materiel De Fonderie*

The patent ceased on the 14th October 1958 owing to non-payment of the renewal fee within the prescribed time and the cessation of the patent was notified in Part III, Section 2 of the Gazette of India, dated the 24th January 1959. Any person may give notice of opposition to the restoration by leaving an application on Form 6 of the Indian Patents and Designs Rules 1933, at the Patent Office 214, Lower Circular Road, Calcutta-17 on or before the 31st October 1959.

Registration of Designs

The following designs have been registered. They are not open to inspection for a period of two years from the date of registration except as provided for in Section 50 of the Indian Patents and Designs Act.

The dates shown in each entry is the date of registration of the designs including in the entry.

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

Class 1 No 99001, Machine Craft Corporation of 138, Canning Street, Post Box No 515 Calcutta-1, State of West Bengal, India, an Indian sole proprietary concern, 'Clutch bracket for rice mills' April 7 1959

Class 1 No 99931 The General Electric Company Limited of Magnet House Kingsway London WC 2 England, a company incorporated under the Laws of England, 'An electric switch-fuse', (5th January 1959), June 23, 1959
